#### TO SOFTEN AN EGG.

If you would soften an egg that has boiled too long, lift the saucepan instantly off the fire and place under the cold water faucet, allowing a good stream of cold water to run into it. The sudden shock in changing from hot to cold water has the curious effect of softening the egg.

#### A MASONIC HOME BOY.

The Masonic Home Journal, of January 15, has a cut of Francis C. Heinz, and the following article:

We herewith present the likeness of the newly elected Master of Excelsior Lodge No. 239, Francis C. Heinz.

Brother Heinz was born near Dover, in Bracken County, September 18, 1887. His father died when he was five years of age leaving three brothers and two sisters, all of whom entered the Masonic Widows and Orphans' Home from Fox Lodge No. 386, Dover, Mason County, Kentucky, on July 5, 1895.

Francis left the Home six years later. He became a member of Excelsior Lodge in 1908 and was made Master December 22, 1913. This was a truly remarkable rise, for a Mason so young, he having been a member of his Lodge only five years and becoming Master at the age of twenty-six. Brother Heinz' youngest brother has also joined Excelsior, doing so on his 21st birthday. He too expects to be Master some day.

Brother Heinz has been engaged in the plumbing business ever since he left the Home ten years ago. It is a great pleasure to the Home Journal as it will doubtless be to the members of his home lodge to learn of his preference.

We wish Brother Heinz a prosperous and happy Masonic career.

The Editor of The Public Ledger remembers this family well, and also the day they left Dover for the Masonic Home.

They were poor and homeless, their father, a member of Fox Lodge having died and left his family penniless. The results show the noble work of the Masonic Home.

HON. GEORGE D. ALDEN, Hon. George D. Alden is today one of the most popular lecturers on the American platform. He is the first lecturer with whom the Redpath Bureau ever closed a five year contract, a contract which began two years ago. Judge Alden is not only an orator, but is a poet, and in his lectures gives some of his original poems, which always are appropriate to the theme. His subjects sound most interesting. In

deed, and his lectures are more interesting. "The Seeds of the Hour," "The Powder and the Match," "The Historic Confession," "With and Humor of the Bench and Bar" and "On the Road to Damascus" are the principal subjects of which he treats.

Judge Alden was first a lawyer in the east. He is from Massachusetts and a son of the Mayflower Pilgrims and Puritans. He is clean and clear cut; has Yankee wit, coupled with Yankee practical sense; has courage and conviction, and is the typical man with the message.

#### AFTER FIVE YEARS

Winthrop Child Was Restored to Health By Vinol.

"Five years ago our little girl had a severe attack of diphtheria which left her subject to bronchitis and stomach trouble. She has been almost constantly under medical treatment. I have tried also two or three remedies containing cod liver oil but found her stomach rebelled against the oil. Reading your description of Vinol I decided to try it and did so with most astonishing results. I cannot begin to tell you how she has improved because you do not know what a little sufferer she was for five years. She has gained ten pounds since she commenced to take Vinol, and the story of what Vinol has done for her is only half told in this letter." Mrs. Adelaide Mulloy, Winthrop, Maine.

Vinol contains all the healing curative properties of cod liver oil, without the oil, and tonic iron added. That is why it helped this little girl after other remedies had failed.

We ask mothers of weak, sickly children to try Vinol on our offer to give back your money if it fails to help them. J. C. Peor, Druggist, Maysville, P. S. Our Saxon Salve is truly wonderful for Eczema. We guarantee it.

#### NEW LINE OF STEAMBOATS FOR THE OHIO.

Representatives of a new steam boat concern which was organized last week at Point Pleasant were in Huntington Thursday afternoon and night trying to arrange for wharfboat facilities for their line here. It was stated that if the company, which is incorporated with an authorized capital stock of \$100,000, could not land its boats at the Huntington wharf, it would build a wharf boat of its own here within the next year. Several business men here were approached in regard to whether shippers in Huntington would patronize the new company, which is chartered under the name of The Security Steamboat Company.

The gentlemen who were here refused to divulge their plans for the immediate future, and it would not be learned how many boats they intend to operate here or just when they will put their first boat on the river. It was admitted, however, that the boats are to run in the Pittsburgh-Cincinnati trade, and that they will be run on a faster schedule than the present boats attempt to make. The company is to have finely fitted out boats with an up-to-date dining room and cabin service on each steamer.

The members of the company, as announced here Thursday night are C. C. Bowyer, C. R. McCullough, Homer Smith, T. Strubling, C. K. Blockwood and J. S. Spurgeon.

#### NEARLY EVERY MINERAL

Except Gold Is Found In Mines of State of Kentucky

Washington.—While the nonmetallic mineral production of Kentucky is of far greater value and importance than the metallic output of the State, 1912 statistics of the latter, issued in book form by the United States Geological Survey will command interest nevertheless. They show that Kentucky, in addition to being one of the greatest coal, coke and clay-products States in the world, produces nearly everything else in the mineral line, except gold.

The statistics made public supplement those for 1912 on nonmetals, which were published in the Courier-Journal several weeks ago.

Kentucky ranked twenty-third in 1911 with a mineral output valued at \$19,296,614; also twenty-third in 1912, with output value of \$22,452,984. Increase in 1912 over 1911 being \$3,156,370, a percentage of 16.36.

The production of lead and zinc in Kentucky, 1912 was: 100 short tons, valued at \$9,540; zinc, 491 short tons, valued at \$67,758. Total value of lead and zinc in 1912, \$77,298. Kentucky in 1911 produced 57,282 long tons of pig iron, valued at \$470,342, against 75,578 long tons of pig iron in 1912, valued at \$1,221,161. Increase in 1912 of 19,596 long tons, valued at \$350,619, or percentage of 33.80. In the Kentucky-Illinois district the production of both lead and zinc concentrates in 1912 was more than double that of 1911, says the Survey. "Lead is mostly produced in this district as a by-product in the concentration of the fluorapatite ores. The large output in 1912 was a result, therefore, of the prosperity of the fluorapatite industry and was especially due to the large new mill at Rosiclare. The zinc output was chiefly of carbonate ore, but there was also a promising output of zinc-blende concentrates."

The reason a fat woman knows she isn't getting any fatter is because she can let out the seams and wear the same clothes she wore last year.

#### CUT-OUT PROPOSED

Are We Again To Have To Face Another Era of Intimidation?

(Augusta Chronicle.) On Monday a Chronicle representative heard two of the leading tobacco growers of Bracken County discussing the "cut out" question. They were of the opinion that a large crop should be grown this year, and a cut out entirely in 1915.

It seemed to be the opinion of both of these gentlemen that the farmers of the whole district could be united on this question, and that this is the proper method of advancing the price.

The way The Ledger looks at it is that this is a free country and any one who wishes should be allowed to raise tobacco, if he has the ground and wants to.
